## Ten Years of ALTG Research Outcomes

2004 – 2014

Lung Foundation Australia launched the Australasian Lung Cancer Trials Group (ALTG) in March 2004 after recognising the need for a dedicated lung cancer trials group in Australia and New Zealand. Inaugural Chair Professor Kwun Fong worked with the members of the Management Advisory Committee and the Scientific Advisory Committee to develop the foundation the groups future success and growth. Since its launch in 2004, ALTG has become recognised as the Australian and New Zealand group for Investigator-led thoracic cancer research.

The ALTG Research Report will be available in November to support the Lung Foundation's Shine a Light on Lung Cancer campaign which focuses on raising awareness and funds for lung cancer research.
